Unified communications in the cloud

Join the CirriusUC Cloud

Corporate Overview

CirriusUC is at the forefront of technological advancements, offering hosted Unified Communications Solutions that are modular and easy for our customers to use while still offering feature-rich functionality. With CirriusUC our customers utilize the best in virtualized technologies available today, increasing service levels and scalability to new heights. Our engineers will design and right size your solutions for all of your business requirements.

CirriusUC's pricing models are based on a more flexible Operational Expense System allowing our customers to expand and contract their expenses based on business need. Gone are the days of heavy Capital Expenditures for costly equipment that will inevitably end up underutilized and over budget.

CirriusUC is committed to providing unsurpassed quality and services; integrating solutions which are carefully tailored to your business structure and services, from concept to execution. By design the cloud-based solution is modular, easy to install, deploy and support.

The solution will be hosted in our CirriusUC "state-of-the-art" data center, designed in accordance with government specifications. CirriusUC's primary focus is "security", we hold a (SAS70 Type II) certification which is compliant with the "de facto standards" in accordance with (Sarbanes-Oxley), (HIPAA), (PCI-DSS), (FIPS-140). You will have peace of mind; knowing that your data is routinely backed up and securely stored, safe from any threat or disaster.
