

## Business Continuity Solutions

CirriusBDR Business Continuity Solutions insures your applications and data are available during planned and unplanned outages. Our services provide high-availability and robust data protection to accommodate any budget and flexible enough to address any technology constraints.

Unprecedented data growth is challenging companies of all sizes, placing increasing pressure on their backup and recovery initiatives. With mounting pressure to comply with regulatory requirements and improve disaster recovery practices, companies are experiencing dissatisfaction with traditional backup methods that are falling short regarding efficiency, reliability, and ease of use. An ever expanding network of central, remote and branch offices further confounds the situation. The need to deliver against strict service level expectations, while managing costs, turns information recovery management into a complex challenge for enterprise data centers of all sizes.

A new industry paradigm shift around backup redesign is finally catching up with virtualization and public/private cloud computing. Delivered to both small and medium enterprises (SMEs) and large enterprises as a perpetual (Private Cloud) license, term (Private Cloud) license, or as an online (Public Cloud) backup service the CirriusBDR solution is designed to deliver against strict service level expectations, while managing costs.

## Empower your Enterprise

### Hybrid Data Protection Strategy

You do not need to choose whether to completely manage the entire company data or completely outsource it to an Online Backup Service Provider. CirriusBDR is the only solution available that allows mixing and matching and seamlessly switching between the two strategies without having to reinstall the backup and recovery client software.

### Cloud Data Protection Strategy

You can leverage the Public Cloud or use your company's Private Cloud to optimize the backup of distributed remote locations, virtual machines and mobile users.

### Control vs. Custody

CirriusBDR is the only solution that always ensures your control of backup data. You can easily migrate your backup data from your internal data center to an MSP's facility or vice-versa using the CirriusImpact migration tool—without having to reinstall the backup and recovery client software. As your backup strategy changes, retain the custody of your data or outsource it to an MSP, but you always have control over your backup data. CirriusImpact offers a variety of clear, cloud-migration paths.

### Single Code Base and Common Platform

CirriusBDR offers a holistic data management solution that includes technologies like LAN Storage Discovery, Mass Deployment, Encryption, Continuous Data Protection, Duplication, Reporting, Backup Lifecycle Management with a single code base and unified platform.

Features and Benefits	
SLA Compliance	<ul style="list-style-type: none"> <li>CirriusBDR cloud BU architecture offers local storage option which provides fast backups &amp; data recoveries</li> <li>Autonomic healing &amp; restore validation testing provides certainty that data is recoverable</li> <li>Incremental forever BU, block level dedupe &amp; compression w/BW throttling</li> </ul>
Laptop Protection	<ul style="list-style-type: none"> <li>Easy to use GUI enables laptop fast BU &amp; Recovery</li> </ul>
Security & Compliance	<ul style="list-style-type: none"> <li>FIPS 140-2 certification guarantees compliance to regulations and encryption standards</li> <li>CirriusBDR doesn't listen so is not hackable &amp; data is encrypted before sent over the cloud</li> </ul>
Agentless Technology	<ul style="list-style-type: none"> <li>Mitigates or eliminates app disruptions or scheduled downtime</li> <li>Eliminates hidden agent costs &amp; reduces TCO</li> </ul>
Overall Cost of BU	<ul style="list-style-type: none"> <li>BU migrated to lower cost storage w/policy based data destruction with certificate of destruction. Aligns value of data with cost of protecting it</li> </ul>
Centralized Architecture	<ul style="list-style-type: none"> <li>Multi-platform is an all-in-one solution and defines the industry standard for Cloud Backup architecture</li> </ul>
Consistency of BU Process	<ul style="list-style-type: none"> <li>offers Best in Class Cloud BU solution w/ extensive experience &amp; knowledge</li> </ul>

## cirriusBDR Server Specifications:

There are four server solution bundles available through CirriusBDR. The server “Packaged Solutions” are designed to satisfy the computing power necessary for your client. Managing the hardware, patching the OS, monitoring and backup requirements for a single server or multiple servers, that includes 24/7/365 Support.

cirriusBDR Server I	cirriusBDR Server II	cirriusBDR Server III	cirriusBDR Server IV
<b>Server I Tower : \$495.00/mo.</b> <b>Server I Rack: \$515.00/mo.</b>	<b>Server II Tower : \$795.00/mo.</b> <b>Server II Rack: \$815.00/mo.</b>	<b>Server III Tower : \$1,295.00/mo.</b> <b>Server III Rack: \$1,315.00/mo.</b>	<b>Server IV Tower : \$1,995.00/mo.</b> <b>Server IV Rack: \$2,015.00/mo.</b>
<ul style="list-style-type: none"> <li>• Intel Server Platform Quad Core Xeon Processor</li> <li>• 8GB DDR3 RAM</li> <li>• 1 TB Local Backup (RAID protected)</li> <li>• *Unlimited server licenses</li> <li>• Offsite/Cloud virtualizatin</li> <li>• *1 TB Cloud storage</li> <li>• 24x7 Help desk support</li> </ul>	<ul style="list-style-type: none"> <li>• Intel Server Platform Quad Core Xeon Processor</li> <li>• 16GB DDR3 RAM</li> <li>• 2 TB Local Backup (RAID protected)</li> <li>• *Unlimited server licenses</li> <li>• Offsite/Cloud virtualizatin</li> <li>• *2 TB Cloud storage</li> <li>• 24x7 Help desk support</li> </ul>	<ul style="list-style-type: none"> <li>• Intel Server Platform Quad Core Xeon Processor</li> <li>• 24GB DDR3 RAM</li> <li>• 4 TB Local Backup (RAID protected)</li> <li>• *Unlimited server licenses</li> <li>• Offsite/Cloud virtualizatin</li> <li>• *4 TB Cloud storage</li> <li>• 24x7 Help desk support</li> </ul>	<ul style="list-style-type: none"> <li>• Intel Server Platform Quad Core Xeon Processor</li> <li>• 48GB DDR3 RAM</li> <li>• 7 TB Local Backup (RAID protected)</li> <li>• *Unlimited server licenses</li> <li>• Offsite/Cloud virtualizatin</li> <li>• *7 TB Cloud storage</li> <li>• 24x7 Help desk support</li> </ul>
<p>* Software Licenses: Windows Servers 32/64B, Windows Workstations/Desktops (Local Only), Linux (I386 / X86_64),Exchange, Microsoft SQL, Share Point</p> <p>* Additional Cloud Storage: Billed at \$.32 / GB</p>
